

DIMMING SYSTEM SETUP

Centered around the Advance dimming controller and compatible with all Advance 24 Volt power supplies, this system can dim a full load of modules on multiple power supplies down to 17% of their original brightness. Simply adjust the brightness using the Lutron sliding wall switch.

Necessary components:

1. Advance Dimmer [DCA-10-120 (913710830902M)]
2. Lutron Wall Control [WCL-10 (NTFTV)]. One Lutron Wall Control will support up to 60 LED systems (24V Power Supply - Advance Dimmer - LED modules).
